## 1. Abstract

My main goal is to provide a tool, which would be found useful by coding. Sometimes we know there is a method for a certain problem, but we constantly forget what it was called. I would like to propose an web application which would **The main feature should be Flash Cards, which will display functions and the details such as framework, flags, parameters and usage**

## 2. Goal and scope

*Opisz tutaj co chcesz wyprodukować*

## 3. Overview of present solutions

We are living in a world, where help tools and assistants are constantly developed for any sorts of activities.

## 4. Business requirements

### 4.1. Functional requirements - from Crud side

- 4.1.1. As a user I would like to login to manage my commands collection.
- 4.1.2. As a user I would like to create my own collection of flashcards with commands.
- 4.1.3. As a user I would like to add a method to my collection.
- 4.1.4. As a user I would like to display options and parameters to the method.
- 4.1.5. As a user I would like to have a description of the method.
- 4.1.6. As a user I would like to display the details, such as:
  - Framework
  - Language
  - Developer
  - Version
- 4.1.7. As a user I would like to edit a command in my collection.
- 4.1.8. As a user I would like to remove a command from my collection.
- 4.1.9. As a user I would like to have methods unique depending on the name and number or type of parameters.

## 4.2. Functional requirements from - from Front end

- 4.2.1. As a user I would like to have the methods displayed in the form of the interactive Flash cards
- 4.2.2. As a user I would like to display a description of the method on the other side of the Flash card.
- 4.2.3. As a user I would like to have an option to hover over the flags to see what they trigger.
- 4.2.4. As a user I would like to search methods by the name of the method, flags and parameters.

## 5. Database design

6.
